Assignment 6 Solutions

1. Write a Python Program to Display Fibonacci Sequence Using Recursion?

In [1]:
```
def genFibonacci(n,a,b):
    if n == 0:
        return 1
    else:
        result = a+b
        print(result, end=', ')
        genFibonacci(n-1,b,result)
in_num = int(input('Enter the length of Series: '))
print('0, 1',end=', ')
genFibonacci(in_num,1,2)
```

```
Enter the length of Series: 30
0, 1, 3, 5, 8, 13, 21, 34, 55, 89, 144, 233, 377, 610, 987, 1597, 2584, 4181, 6765, 10946, 17711, 28657, 46368, 7
5025, 121393, 196418, 317811, 514229, 832040, 1346269, 2178309, 3524578,
```

2. Write a Python Program to Find Factorial of a Number using Recursion ?

In [7]:
```
def factorial(num):
    if (num < 1):
        return 1
    else:
        return num*factorial(num-1)
num = int(input('Enter a number: '))
value = factorial(num)
print(f'The Factorial of {num} is {value}')
```

```
Enter a number: 7
The Factorial of 7 is 5040
```

3. Write a Python program to Calculate your Body Mass Index ?

In [14]:
```
def calculateBMI():
    in_weight = eval(input('Enter your Weight(kgs): '))
    in_height = eval(input('Enter your height(mts): '))
    calc_bmi = in_weight/pow(in_height,2)
    if (calc_bmi < 17.5):
        status = 'Underweight'
    elif (calc_bmi >= 17.5 and calc_bmi < 23.7):
        status = 'Healthy'
    elif (calc_bmi >= 17.5 and calc_bmi < 30):
        status = 'Overweight'
    elif (calc_bmi >=30):
        status = 'Suffering from Obesity'
    print(f'Your\'re BMI is {calc_bmi} and status is {status} ')
calculateBMI()
```

```
Enter your Weight(kgs): 70
Enter your height(mts): 1.8
Your're BMI is 21.604938271604937 and status is Healthy
```

4. Write a Python Program to Calculate the Natural Logarithm of any Number ?

In [15]:
```
import math
def genNatLog():
    in_num = eval(input("Enter a Number:"))
    print(math.log(in_num))

genNatLog()
```

```
Enter a Number:22
3.091042453358316
```

5. Write a Python Program for Cube sum of first n Natural Numbers ?

5. Write a Python Program for Cube sum of first n Natural Numbers ?

In [17]:

```
def cubeOfNaturalNumbers():
    in_num = int(input("Enter the no of Natural Numbers: "))
    result = pow(((in_num * (in_num +1))/4),4)
    print(f'The Cube Sum of First {in_num} Natural Numbers is {result}')

cubeOfNaturalNumbers()
```

```
Enter the no of Natural Numbers: 4
The Cube Sum of First 4 Natural Numbers is 625.0
```
